English Visible Supply Was Estimated to - Jackson Hills Have Increased a Million and a Half Bushels Last Week-Stocks and Bonds.

CHICAGO, Dec. 10 .- The news in evidence today was all against the bulls, but the uncertainty regarding the government report had a restraining influence upon sellers and May wheat closed but 4c lower. May corn gained %c, May oats closed %c higher and provisions finished lower all around.

Wheat kept within a narrow range. It opened from 4c to 3c below its closing value on Saturday and did not change much afterwards. It was in the main heavy all day, and there was much to make it so, including an increase of 1,200,000 bu, in the quantity of wheat and flour on ocean passage and a decline of from ted to id in prices at Liverpool. Cables from London reported reselling of Russian wheat there at less than shippers' prices. A Liverpool firm cabled that the reports from Argentine were coming better as regards their grop prospects. There was an increase of \$10,000 bu. in the visible supply of wheat here, and Minneapolis and Duluth got 970 carioads today, compared with 746 cars on the corresponding day of last year. May wheat sold at 53%c at the opening and did

not go any lower than 59c during the day. The restraining influence on the bears was the government crop report, due this afternoon. That was too uncertain a quantity
to encourage much selling. The English
visible supply was estimated to have decreased 1,387,000 bu, last week, and New
York reported some filling of orders there for
cash wheat for export. May closed at 59½c.
Corn was strong, considering the weak
feeling which prevailed in wheat. The receipts are giving evidence of falling off. The
weakness in the cash article was the only
hearish feature in today's trade. The opening price for May was 195½c, and it sold at
from 49½c to 49‰c. After that it worked
upward and touched 50½c for a moment,
but was down again at the close to from
49½c to 49‰c. government crop report, due this after-

19%c to 49%c.

Outs were a shade firmer in sympathy with corn and probably influenced by a decrease of 584,0.0 bu. in the visible. May started at 32%c, where it closed after 4c fluctuations.

fluctuations.

The provision market was heavy and prices ruled lower. The packers had products for sale when any one bid for them and sometimes did not wait for bids, but made offerings, shading prices. Hog receipts were 44.000 head, and are estimated at 33,000 head for tomorrow. Prices at the close showed the following losses for May delivery, compared with those on Saturday: May pork, 224c; lard, 124c; ribs, 124c.

STOCKS AND BONDS.

Week Opened in Securities with a Weak NEW YORK, Dec. 10 .- The week opened in the Stock exchange with a weak tone to speculation, being depresend by the heaviness of American securities on the London Stock exchange. There was also some sell-

ness of American securities on the London Stock exchange. There was also some selling here for the foreign account of a majority of the international specialties. A report that Drexel, Morgan & Co. of this city and J. S. Morgan & Co. of this city and J. S. Morgan & Co. of London would issue simultaneously a statement declaring that the Erie reorganization plan would be abandened and that a stock assessment would be levied induced sales of the common stock in an unusually large amount, causing a decline of 1 per cent, while the preferred sales amounted to only 400 shares and broke 7½ per cent compared with the last previous sale, which was made on November 13.

Sugar was heavily traded in, but the movement in the stock was in the hands of the same clique which controlled last week's great speculation in the shares. At the opening a decline of 7½ per cent was made, followed by an advance of 2½ per cent, a reaction of 1 per cent and a gain of 1½ per cent to 33 shortly before noon, that being the top price of the day. During the afternoon the fluctuations were frequent, and shortly before the close the stock touched 80% per cent, the low figure of the morning, closing at a recovery of ½ per cent. Compared with Saturday the shares are down 5% per cent, the low figure of the morning, closing at a recovery of ½ per cent. Compared with Saturday the shares were heavy on sales, believed by many to be in liquidation of long stock for the account of insiders of the group, all closing at the lowest, except New Jersey Central, which rallied 5% per cent in the final trading on small coverings.

In the grangers the trading was light, except as to \$2. Paul of which London

NEW YORK, Dec. 10.—A Wall street circular says: It seems practically certain that no gold will be exported before Saturday. Sterling exchange, however, is strong and rather higher, with the indication that gold will certainly be shipped at the end of the week. Sight sterling is \$4.8%, less a brokerage. Bankers are asking even higher than this in some instances. There is no change in the conditions of the market. It is unlikely that sterling will reach specie point at London for the present. London specie point is about \$4.85 for demand. The Bank of British North America and Brown Bros. have advanced rates to per cent. As to Gold Shipments.

Demand for Cattle.

All Grades from Top to Bottom Suffer in About the Same Proportion-Hogs Show a Loss of 10 to 15 Cents from Saturday.

MONDAY, Dec. 10.
Arrivals of stock today were about up to the average for a Monday. There were an even 200 cars in all, a few more cattle and hogs and a few less sheep than arrived one week ago. The market today was just the reverse

of Saturday's trade, as there was neither strength nor activity to the business, not-withstanding the very moderate supply. So long as people can get poultry and game so cheap they will prefer it to beef and hence the killers have little incentive to fill their cooling rooms. There was no urgent demand, either from dressed beef men or ship-pers, although both bought at prices weak to a dime lower than Saturday. The feel-ing on all sides was very weak, and al-though a very fair clearance was finally effected the movement throughout was de-

HOGS—It has been some time since over 5,600 hogs arrived on Monday, and yet that number was exceeded by considerable today. In fact, the supply was nearly 2,000 heavier than a week ago, and about the same as last week as to quality. Buyers, of course, had the best of the situation, and could get good beavy and butcher weight hogs fully a dime cheaper than Saturday, while they were freely offered the commoner and lighter grades at all of a 15c decline. Fair to choice heavy mixed hogs solid at from \$1.10 up to \$4.42½, with one prime heavy load (\$21 lbs., but not reported) at \$4.50. Light and light mixed stuff sold at from \$1.75 up to \$4.25, There was quite an active inquiry for pigs, and poor 40-lb. to choice 140-lb. Stuff sold at from \$2.25 to \$3.50, but largely at \$3 and over. The market was weak throughout, and closed bad with about 1,500 still unsold. This, however, was mostly light and underweight stuff. As far as sold the decent weight hogs went largely at from \$1.10 to \$4.55, as against \$4.25 to \$4.50 on Saturday, and \$4.40 to \$4.60 on last Monday. Representative sales:

CHICAGO LIVE STOCK. Cattle Supply Too Beavy to Attract Good

CHICAGO, Dec. 10.—Today's cattle supply has been equalled only twice before in the month of December. The effect upon prices was not good buyers were allowed to have their way. Ordinary

prices. Culls and pigs sold slowly at from \$2 to \$3.75.

The sheep market opened rather high and buyers held back, refusing to take at all freely. Sellers showed a disposition to accept lower bids and the market became very active, closing from 10c to 15c lower. DEPARTMENT CROP BULLETIN.

Average Price of Most Products Show a Decline Over Previous Years. WASHINGTON, Dec. 10 .- The average price of tobacco is returned at 6.7c per 1b., against 7. last year, a difference of 1.1c. The average farm price in Kentucky, which is the state of the largest production, is 5.5c per 1b, or 1.2c below the average for the country. The selling price of potatoes on the farm on December 1 is reported at an average of \$5.5c per bu., or 4.5c less than at the same date last year. The average plantation price of cotton, as shown by the department's reports on December 1, was 4.9c per
lb., against 6.99c for the same date last year
and 8.4c in the year 1892, a decline from the
prices of these years respectively of 2.09c and
5.5c per lb. The lowness of these prices is without precedent.

The condition of winter wheat on December 1
averaged 89, against 91.5 in the year 1893 and 87.4
in the year 1892. In the principal winter wheat
states the averages are: Ohio, 93, Michigan, 92;
Indiana, 88; Illinois, 91; Missouri, 22; Kansas,
73; Nebraska, 76; California, 94.

The returns of correspondents of the department make the acreage of winter wheat sown
last fall 193 per cent of the final estimate of the
area harvested, which was 23.518.756 acres, a
figure larger than the preliminary estimate given
out in June last, which upon further investigation was found to be too low. The preliminary
estimate therefore makes the area sown for the
harvest of 1895, 24,224,000 acres. plantation price of cotton, as shown by the de-

WINTER WHEAT CONDITION FOOR. Dry Weather Has Affected the Stooling of

the Plant. CHICAGO, Dec. 19.—The December crop report, as compiled by the Prairie Farmer, to b ssued Tuesday, says that further investigation confirms the estimate made last month of a 5 per cent increase in winter wheat compared with the area harvested this year. The condition of the growing crop averages 91.2, or about two points lower than a year ago. The crop was planted under unfavorable conditions and a large part of the area suffered from drouth during part of the area suffered from drouth during September and October and the plant is not well rooted, stooling poorly and thin on the ground. If hard freezing weather is deferred and there are good rains the deficiencies noted may be corrected, but the general stamina of the plant is less satisfactory than a year ago. A special report on the quality of corn indicates about 77 per cent of the crop is merchantable, or, in round numbers, 1,100,600,000 bu., the smallest since 1883.
